Specifications for Automatic Kinematic Viscometer (FY16 Budget Line Item 9)

*Constant temperature bath series with advanced temperature control circuitry and integrated timing features
*Reliable temperature, simple push-button controls, and accommodation of up to seven capillary viscometers
*Connection of the built-in cooling coil to tap water or a recirculating water chiller
*Seven individual start/stop timers with displays
*Digital Timing
*115V 50/60Hz Microprocessor Controller
*Compliance with ASTM D2170
