

Post Implementation Evaluation Report

Retirement – KPERS Disaster Recovery/Hot Site

Project Dates: 10/2006 through 10/2008

Project Cost: \$252,282

Project Objectives

1. Internal processes involving backing up over a fiber connection to an enterprise level tape drive and implementing an imaging solution that significantly reduces server and data restores.
2. A hot site involving locating or utilizing servers at a determined location to receive replicated data from KPERS primary servers.
