

## **Post Implementation Evaluation Report**

### **Storage Area Network Technology Acquisition –Social & Rehabilitation Svcs**

Project Dates: 7/2007 through 7/2008

Project Cost: \$278,910

#### Project Objectives

The scope of this infrastructure project was to acquire, install and configure hardware upgrades for the Topeka and Wichita SAN/NAS systems which will expand the systems' feature sets enabling implementation of future SRS technologies. When complete it will provide additional network storage, increased frequency of backups, and improved disaster recovery capabilities.
